

4. elasticsearch의 JAVA경로 설정

셸에서는 java실행이 정상적으로 되고 있는데, Elasticsearch를 실행하면 java경로를 찾지 못하는 문제 발생.

근데! Elasticsearch를 실행시키면 java가 없텐다... 그래서 실행이 안됨.

```
Sep  7 00:48:55 TEST elasticsearch: which: no java in (/usr/local/sbin:/usr/local/bin:/usr/sbin:/usr/bin)
Sep  7 00:48:55 TEST elasticsearch: Could not find any executable java binary. Please install java in your PATH or set JAVA_HOME
Sep  7 00:48:55 TEST systemd: elasticsearch.service: main process exited, code=exited, status=1/FAILURE
```

java는 설치 잘 되어 있는데....

```
[root@TEST ~]# echo $JAVA_HOME
/usr/local/java

[root@TEST ~]# which java
/usr/local/java/bin/java
```

1. 해결책1. /etc/profile에 JAVA경로 잘 되어 있는지 확인

```
[root@TEST ~]# tail -4 /etc/profile

PATH=$PATH:$JAVA_HOME/bin
export JAVA_HOME=/usr/local/java
export PATH=$JAVA_HOME/bin:$PATH
```

2. 해결책2. Elasticsearch에 java경로를 설정

```
[root@TEST ~]# tail -1 /etc/sysconfig/elasticsearch
JAVA_HOME=/usr/local/java
```

설정하고 Elasticsearch실행하면 프로세스 실행되는게 확인되실꺼예요~
