

Centos5 安装 dovecot

Dovecot 安装 (centos 5.x 系统)

1. Dovecot 软件包安装

```
$> yum install -y dovecot
```

2. Dovecot 配置

```
$> vi /etc/dovecot.conf#protocols = imap imaps pop3 pop3s
```

```
# 配置 Dovecot 的协议支持
```

```
Ef) protocols = imap pop3
```

```
listen = * 0.0.0.0
```

3. 检查配置并启动 Dovecot

```
[root@localhost /]# chkconfig dovecot on
```

```
[root@localhost /]# /etc/init.d/dovecot start
```

```
[root@localhost /]# netstat -antp
```

Active Internet connections (servers and established)

Proto	Recv-Q	Send-Q	Local Address	Foreign Address	State	PID/Program name
-------	--------	--------	---------------	-----------------	-------	------------------

tcp	0	0	0.0.0.0:110	0.0.0.0:*	LISTEN	2102/dovecot
-----	---	---	-------------	-----------	--------	--------------

tcp	0	0	0.0.0.0:143	0.0.0.0:*	LISTEN	2102/dovecot
-----	---	---	-------------	-----------	--------	--------------

4. 测试 Dovecot (pop3)

```
$> telnet localhost 110
```

```
user test
```

```
pass 123456
```

```
list (1 2 3 4 5 6 7 8 9 10 11 12 13)
```

```
+OK 13 messages:
```

```
1 5081
```

```
retr 1 (1 2 3 4 5 6 7 8 9 10 11 12 13)
```

```
+OK 5081 octets
```
