

php 경로별 모듈 인식 오류

1. php경로에 따라서 모듈을 못읽는 경우

```
[root@localhost ~]# php -m
```

```
PHP Warning: PHP Startup: Unable to load dynamic library '/usr/local/php/lib/php/extensions/no-debug-zts-20060613//usr/local/php/lib/mssql.so' - /usr/local/php/lib/php/extensions/no-debug-zts-20060613//usr/local/php/lib/mssql.so: cannot open shared object file: No such file or directory in Unknown on line 0
```

```
[PHP Modules]
```

bcmath

2. 해결방안

```
$> vi /usr/local/php/lib/php.ini
```

```
;extension_dir = "."
```

내용을

```
extension_dir = "/usr/local/php/lib/php/extensions/no-debug-zts-20060613/" --> extension실제 경로로 변경하면 됨.
```
